Debris Collection Box

Specifications

Door

Top hinged door, framed with 4 vert. and 4 horiz. angle frame supports. Panels are 12-gauge steel. The door has a hose support and a flexible rubber gasket with a hole to accommodate the exhaust hose.

Hinges

4 cleave-type hinges which are constructed of 3/8" thick steel with 3/4" thick pins.

Latch

Unique easy-open latch eliminates door rod binding. The convenient handle easily locks and unlocks the box door for dumping.

Box Interior

Smooth interior for easy dumping and equipped with heavy-duty rubber deflector to stop debris from hitting the front of the box.

Floor Panel

Box floor is a short floor panel that allows the box to overhang the back of the truck by as much as 12".

Top Screens

The top is two-thirds vented with 1/2" expanded flattened steel. The screen is supported with 3/16" x 1-1/2" angle frames.

Lifting Eyes

4 lifting eyes, two on each corner are welded to the top of the box allowing the box to be lifted easily with a crane or hoist.

Handles

4 convenient handles are welded to the long sides of the box, two at 3 feet from the bottom, and two at 6 feet from the bottom.

Box Interior

Smooth interior for easy dumping and equipped with heavy-duty rubber deflector to stop debris from hitting the front of the box.

Gasket

The 12", 14", or 16" diameter hole is positioned to support the bottom of the exhaust hose 40" from the bottom of the box. Other heights and hole diameters are available as an option. Please specify diameter when ordering.

Paint

Primed with a rust inhibitor primer and painted with two coats of automotive quality paint. White is standard, other paint colors available as an option.

Easy to open and close latch mechanism makes closing the door simple and virtually effortless.
