

QUAD-STEER ROTO-HI-DUMP™

Haul in-plant refuse
Deliver components
Transport supplies

The Quad-Steer Roto-Hi-Dump™ is the variable-position dump trailer that can dump its cargo to the rear or to either side for maximum operating versatility. It's perfect for dumping into packer trucks, roll-off boxes, or conveyor lines.

The positive-tracking trailer that dumps three ways.

The 1.75- or 2-cubic yard poly dump box is virtually indestructible, and can handle loads up to 1,000 pounds with ease. And the Quad-Steer TRACKER™ positive-tracking base permits tight turns in cramped quarters, making the Roto-Hi-Dump™ ideal for moving high-volume parts, supplies and refuse.

Manufactured by

Roto-Hi-Dump™: Versatile, Maneuverable, Efficient.

The rotating and lift mechanism is a proven design providing years of trouble-free service. The on-board electrical system is totally self-contained, adding to the versatility.

Dual release handles make rotating simple. Automatic stop points at 90-degree increments position the dump box for side or rear dumping.

The Roto-Hi-Dump™ is at work in many industrial and large plant operations hauling refuse, transporting supplies, and delivering components. Its ease of use means increased operator safety and efficiency, and the maneuverability of the Roto-Hi-Dump™ is essential when dealing with an existing plant layout. Unlike high-cost, dedicated refuse hauler vehicles, the fully self-contained Roto-Hi-Dump™ trailers free up your tug vehicles for additional tasks.

The versatility of the Roto-Hi-Dump™ is also seen in other markets which rely on its combination of hauling ability and efficiency:

- Government agencies use the Roto-Hi-Dump™ to transport large volumes of paper waste for shredding.
- Thorough-bred horse operations, dairy confinement operations and zoos use the Roto-Hi-Dump™ to deliver dry feed and bedding material.
- Resorts use the Roto-Hi-Dump™ to transport material as well as to haul refuse.
- Hospitals use the Roto-Hi-Dump™ to transfer laundry.
- Amusement parks, sports complexes and shopping malls also use the Roto-Hi-Dump™ for their refuse-hauling needs.

Versatility. Maneuverability. Efficiency. The Roto-Hi-Dump™ delivers all three.
