

PowerBoss®
The Power of Clean

Scrubmaster B120 R

For excellent results and high levels of productivity

High performance, a small turning radius and a sophisticated design: These are the characteristics that make the Scrubmaster B120 R the perfect choice for cleaning building such as congested warehouses, automotive dealers, beverage facilities, or airplane hangars. The machine's independent 32 gallon solution tank capacity, standard 315 AH long runtime batteries, and four different scrubbing platforms, ensures fast and efficient cleaning of most mid-sized areas.

Ergonomic workplace

Ergonomically designed in every detail and equipped with a wide range of practical features that facilitate efficient working, the Scrubmaster B120 R is a perfect workplace for the operator. The comfortable seat enables a pleasant, back-friendly seating position. All operating elements are clearly arranged and within easy reach of the driver.

Disc or cylindrical performance

The Scrubmaster B120 R offers both disc or cylindrical scrubbing performance. When equipped with dual cylindrical brushes, the B120 R can sweep and scrub in a single pass or use up to 50% less water with Aqua Stop disc scrub brush technology.

Thanks to its compact design, the Scrubmaster B120 R can work in narrow aisles and corridors.

Highly flexible working

The Scrubmaster B120 R enables easy cleaning of corners or narrow aisles and corridors. Thanks to its 90-degree steering angle and small turning circle of only 179 cm, the machine can make a complete U-turn even in very small areas.
